

WEB novel Afterword.

This brings an end to the story of Rudeus Grayrat, a former unemployed NEET.

Although we were shown a future of Hitogami's defeat, the future is still uncertain, so the fight between Hitogami and various other people will still continue.

However, the story of Mushoku Tensei itself tells the tale of Rudeus Grayrat, so please let me have the privilege of ending the story for now.

The total writing time would be around 2 years. And as for the total amount of characters it should be 2,830,123. I, myself have never written a story this long. Despite fumbling around in an unknown territory, I continued writing without stopping and I was able to reach the conclusion, I think that is all thanks to the readers, who supported me until the end.

Thanks to the huge amount of comments & reviews (total of 34.000+), I was able to reach the 1st place in Narou.

"Don't be fooled by the numbers, or believe that your (writing) ability rapidly increased because of the growing numbers, it doesn't mean that the story you have written until now suddenly became interesting, don't be tempted and only look at yourself as an author" -or so I kept telling myself and yet I do not know just how many times I have been encouraged by the title "First Place", which shone so brilliantly. Of course, apart from the numbers, there are a lot of aspects that I must reflect upon as well..

I think the fact that my story was able to gain top spot in Shousetsuka ni Narou where a lot of different authors assembled will become my self-confidence in the future, enabling me to move forward with this power.

Thank you very, very much.

While putting my efforts towards the published version I am thinking about writing the Redundancy volume which will include 10 years of Rudeus' story, from his age of 24 to 34 years old, stories after he passes 34 years of age, stories focused on the kids, stories of characters that I didn't focus on too much, at a slow pace of 1-2 chapter a month. I look forward to working on both the published version of the main series and working on the Redundancy.

Well then, once again, this was Rifujin na Magonote. Thank you so so much for your readership.
